BAB I PENDAHULUAN ...................................................................... 1
1.1 Latar Belakang Masalah ........................................................... 1
1.2 Maksud dan Tujuan ................................................................. 3
1.3 Metode Penelitian ................................................................. 4
1.3.1 Metode Pengumpulan Data ............................................... 4
1.3.2 Metode Pengembangan Software ........................................ 5
1.4 Ruang Lingkup ........................................................................... 6

BAB II LANDASAN TEORI ......................................................... 7
2.1 Konsep Dasar Sistem ............................................................... 7
2.1.1 Pengertian Sistem ............................................................. 7
2.1.2 Karakteristik Sistem .......................................................... 8
2.1.3 Klasifikasi sistem ............................................................... 10
2.1.4 Jenis-jenis Sistem .............................................................. 13
2.1.5 Konsep Informasi ............................................................... 14
2.1.6 Konsep Sistem Informasi .................................................. 16
2.2 Peralatan Pendukung (Tool System) ........................................ 19
2.2.1 Pengertian UML ............................................................... 19
2.2.2 Pengertian Activity Diagram ............................................. 20
4.3 Jadwal Implementasi ......................................................... 68
BAB V PENUTUP ........................................................................ 69
  5.1 Kesimpulan ........................................................................ 69
  5.2 Saran ................................................................................ 69
