**Aston Villa S. Pelawi (12150339), *Design of Inventory Information System At PT. Hana Star Indonesia.***

*Inventory of goods or the fulfillment of production needs is an important activity as part of the internal control of a business organization that needs to be done carefully and thoroughly. PT. Hana Star Indonesia in its inventory activities is still done poorly, and still uses bookkeeping, where the company is engaged in painting body services which until now still become one of the industry continues to grow rapidly. While data processing and reporting using Microsoft Excel so that makes the internal control activities performed by the leadership of the company, in addition to problems such as the difficulty of finding goods, the mismatch amount of physical goods with the note in the book into constraints that are still faced frequently. With the existing problems, it is designed internal inventory control system so that all data recorded accurately and accurately. The design of this system is expected to provide convenience to the leadership in the internal control of daily production activities by providing accurate and timely information.*
