

ABSTRACT

Aal Amelia (12150354), Sales Information System Design Spare-Parts And Motorcycle Repair Service At Mitra Ahass SMK PGRI Subang's Workshop.

In this digital age information technology is growing very fast. There are many innovations that are created to provide one of the convenience of the computer, at this time the computer continues to make good progress in terms of making hardware and software. Mitra Ahass SMK PGRI Subang's workshop is one business that is engaged in repair and sales of spare parts. System sales and repair services that exist in the workshop of Mitra Ahass SMK PGRI Subang still doing sales and transactions in conventional, Storage of sales transaction data and other data relating to sales to reporting are all still conventional, this allowing mistakes in the transaction process. Therefore built a desktop-based system using visual studio 2010. With the new system in the workshop of Mitra Ahass SMK PGRI Subang can help the workshop officers in the process of data collection and will provide convenience and speed management decision-making
