

ABSTRAK

Kaunen (11142047), Aplikasi Pengolahan Data Anggaran Pendapatan dan Belanja Desa (APBDES) pada Kantor Desa Bakau Kecamatan Jawai Berbasis Web.

Bidang Akuntansi telah mengalami berbagai kemajuan dalam hal pengolahan transaksi keuangan sehingga informasi akuntansi dengan mudah dapat diolah dengan cepat. Namun beberapa perusahaan atau instansi dalam pengolahan data keuangan akuntansinya masih secara sederhana sehingga kemungkinan kesalahan-kesalahan sering terjadi serta akurasi data kurang tepat. Pengolahan Data Anggaran Pendapatan dan Belanja Desa (APBDES) pada Kantor Desa Bakau Kecamatan Jawai. Pengolahan APBDES yang masih sederhana dengan menggunakan Microsoft Excel. Pengolahan data APBDES yang sederhana ini menghasilkan beberapa laporan yang kurang akurat antara laporan satu dengan yang lainnya, padahal antara laporan tersebut sangat berkaitan. Maka dari itu, Penelitian dalam Tugas Akhir ini, membahas Aplikasi Pengolahan Data Anggaran Pendapatan dan Belanja Desa (APBDES) yang dirancang untuk Kaur Keuangan, Bendahara, dan Aparatur Desa. Aplikasi ini dirancang dapat mengolah data pengguna, data pejabat, data periode, data akun, data bidang, data program, data kegiatan, serta data anggaran Pendapat dan Belanja Desa (APBDES). Laporan yang dihasilkan aplikasin pengolahan data APBDES ini antara lain : Laporan APBDES, Laporan Rencana Penggunaan Dana, Laporan Buku Kas Umum, Laporan Penerimaan, Laporan Pengeluaran dan Laporan Pertanggungjawaban. Dengan adanya aplikasi pengolahan data APBDES pada Kantor Desa Bakau Kecamatan Jawai ini, diharapkan dapat membantu Kaur Keuangan, Bendahara dan Aparatur Desa dalam mengolah data APBDES lebih mudah, cepat dan Akurat.

Kata Kunci: Aplikasi, Web, APBDES

ABSTRACT

Kaunen (11142047), Application of Data processing Budget revenue and Expenditure of the village (APBDES) in the office of Bakau Village of the subdistrict of Jawai Web based.

The field of Accounting has experienced various advances in terms of processing financial transactions so that accounting information can easily be processed quickly. But some companies or agencies in the processing of financial data in a simple still the accounting so that the possibility of mistakes often occur as well as the accuracy of the data is less precise. Data processing Budget revenue and Shopping Village (APBDES) in the office of Bakau Village of the subdistrict of Jawai . Processing of APBDES which is still modest by using Microsoft Excel. Data processing APBDES this simple generates several reports that are less accurate reporting between one another, whereas among those reports are very concerned. Therefore, research in this final Task, discussing the application of the Data processing Budget revenue and Budget revenue and Shopping Village (APBDES) designed for Kaur finance, Treasurer, and Village Apparatus. These applications can be designed to process user data, data officers, data period, account data, data field, data, programs, data, activities, and budget data and Opinion Shopping Village (APBDES). The resulting report data processing Application APBDES : APBDES Reports, Report of Revanue, Report of Expenditure, Report of general ledger book and Reports of Accountability. With the APBDES data processing applications at the offices of the village of mangrove Subdistrict Jawai hopefully can help Finance Kaur, Treasurer and Apparatus of the village in the APBDES process data more easily, quickly and accurately.
