

## **ABSTRACT**

*Yusriyani (11171218), Design and Building of Accounting Information System for Purchasing Material Supplies in Cash at Cikampek Laundry Mentari.*

*The very rapid development of science and technology has given birth to information and communication technology. The development of information and communication technology has led to many changes. not only individuals but industries are also required to adapt to existing technological developments. Mentari Laundry is a business engaged in laundry services or washing and ironing services based on the weight (kilograms) of consumer laundry. In running its business, Mentari Laundry still uses a manual or bookkeeping system. The process of recording and processing data like this has many weaknesses. These weaknesses include the occurrence of recording errors, data loss and ineffective and inefficient data retrieval. Making a web-based computerized system using Netbeans IDE 8.1 with MYSQL as a data storage medium. With the web-based computerized system, it is hoped that it can make the business processes in the cikampek laundry sun more effective, efficient, and accurate.*

*Keywords: Accounting Information System Design, Cash Purchases*
